EQUIPMENT DRAPES

A range of sterile drapes for scopes and other imaging systems

HIGH–DEFINITION CAMERA DRAPE

The next level of camera drapes.

- Suitable for high-definition camera systems without compromising the HD image quality.

- Closed-end offers camera full protection from fluids and acts as a reliable sterile barrier.

- Allows quick and easy scope changes during procedures without compromising sterility.

- Broad-edged ring ensures ease of use and prevents contamination of the sterile field.

- Sterile, single-use.

CODE	DIMENSIONS	UNIT OF SALE
ECN150-250CAP	Size 150mm x 2.5m, Ring aperture 85mm	50

TRAINING VIDEOS AVAILABLE

01 Attach the endoscope

Simply push the endoscope into the drape holder.

02 Attach the camera

Connect the camera onto the camera drape holder and extend the drape over the cable by pulling back the ring.

Any excess drape is retained inside the ring.

QUICK CHANGE CAMERA DRAPE

- Simple and secure 2-step fixing method.

- Allows quick and easy scope changes during procedures without compromising sterility.

- Closed-end offers cameras full protection from fluids and acts as a reliable sterile barrier.

- Broad-edged ring reduces risk of contaminating the sterile field.

- Sterile, single-use.

CODE	DIMENSIONS	UNIT OF SALE
ECE150-250C	Size 150mm x 2.5m, Ring aperture 85mm	50

**TRAINING VIDEOS AVAILABLE**

01 Attach the camera

Simple push-fit. The drape can then be extended over camera and cable by simply pulling back the ring.

Any excess drape is retained inside the ring.

02 Attach the endoscope

Simple and secure snap–on fitting.

CONCENTRIC RING STYLE

- Ring style drapes ensure easy and efficient application without compromising sterility.

- Drape is fully contained within the ring and can be simply pulled back over camera and cable.

- Any excess material remains securely inside the ring.

- Available with 3 different closures.

- Sterile, single-use.
